

Throughout South Alabama and the Gulf Coast region, Hutchinson, Moore & Rauch, LLC provides professional surveying and mapping services to both public and private sector clients. HMR's licensed professionals apply their considerable experience and innovation with accuracy and efficiency, to deliver our clients a successful project, every time.

Hutchinson, Moore & Rauch's surveying department consists of a team of dedicated and licensed professionals. Using advanced survey equipment and current mapping technologies, we provide surveys that meet all current standards. Upon completion of field surveys, maps are created using AutoCAD. For large scale topography and construction staking projects we utilize GPS technology. Our survey and mapping personnel are trained and experienced in the use of the latest electronic data collection technology allowing us to gather the necessary field information in the most efficient and cost effective manner for our clients. Our technical office personnel use a computer aided design and drafting (CADD) system for all phases of our land surveying work.
