Engineers ♦ Surveyors ♦ Land Planners

Transportation Services

HMR understands that urban and suburban growth continues to place increasing demands on local infrastructure. Keeping cities connected and moving forward is what we do.

Transportation Planning and Design can involve a wide spectrum of topics and can include both public and private sector projects. Primarily, Transportation Planning and Design invokes the idea of moving people in vehicles via roadways; however, it largely includes pedestrian traffic and recreational facilities. HMR's Transportation Planning and Design professionals have the resources and expertise needed in creating successful living and working environments. HMR has assembled a team of Planners and Engineers experienced in land use, transportation systems, zoning, permitting and land planning. We provide choices and cost effective solutions to complex infrastructure issues to efficiently manage the transportation needs of each client. Currently, HMR holds an ALDOT Statewide Design and Survey Services contract.

In order to tackle today's challenges while anticipating tomorrow's growth, HMR provides unsurpassed project delivery methods, flexible alternatives and prompt project scheduling.

- **Highway, Freeway and Tollway**
- **Municipal Roads and Streets**
- **Traffic Impact Study**
- **Highway and Bridge Design**
- **Access and Right-of-Way Management**
- **Traffic Signage, Illumination & Signalization**
- **Sidewalks and Structures**
- **Marine Harbors and Ports**
- **Right-of-Way Survey**
- **Corridor Survey**
- **Functional Design Services**
- **Engineering Review Report**
- **Final Design Services**
- **Permitting**
- **Agency Approvals**
